

FUNCTIONAL INFORMATION LEAFLET FOR DIGITAL SIGNAGE & IPTV

**FEATURE: DROPBOX**

The Dropbox widget allows you to synchronize one or more of your Dropbox folders with Oscart. Changes in these folders such as the addition, modification or deletion of media files are picked up automatically and the Dropbox zone on your page(s) is updated instantly without requiring user interaction in the CMS. In other words this widget is a great feature that allows automation and easy delegation in content management.
